

Personal Franking Machine less \$70.00 AND purchase

- ① Take the calculators that P.O.'s have that print post labels.
- ② Reduce to hand held size ~~with keypad display window~~
~~on Alpha Display~~
- ~~③ Add a memory cartridge to hold~~
- ③ Encase a EEPROM or Bubble memory to hold \$ of postage left unused. (DES encoded!) & CO. name.
- ④ Possible functions - recognize a sale as multi stamp & maintain ^{running} total.
- ⑤ User punches in \$ of stamp required, calculator prints out a label & reduces \$ of stamp remains
- ⑥ user can get PFM to ~~print out~~ ^{show} \$ remains
- ⑦ take machine to P.O. to get \$ recharge for machine w/ DES encoded hard stroking protection.
- ⑧ P.O. Can program machine to print return address?
Co. name?
- ⑨ P.O. sells rolls of special paper.
- ⑩ ? each PFM has unique serial # & offers it to ~~stamp~~ ea outpatted stamp.
- ⑪ Must be secure enough so can post anywhere.
- ⑫ Could be a business calculator as well except print out. would be expensive on PO paper or mailing would require glue 
- OK could sell contact adhesives tapes to stick down stamp.
